E-WASTE REGISTRATION & RECYCLING TARGET CALCULATOR

Complete Task Report + Working Web App Source Code

This PDF contains the completed mini-task and the full HTML/CSS/JavaScript source code for the web application created from the supplied assignment instructions.

1. Implemented Features

The web app includes company registration, entity type selection, annual e-waste input, actual recycled e-waste input, financial-year selection, automatic EPR target calculation, registration-fee lookup, compliance status, add/remove company controls, sample data, and a responsive mobile-friendly interface.

2. Rules Implemented from the Supplied Task

Financial Year	Target %
2023–24 / 2024–25	60%
2025–26 / 2026–27	70%
2027–28 onward	80%

Formula: Target (MT) = Annual E-Waste Generated × Target %.
Compliance: Compliant if actual recycled ≥ target; otherwise Non-Compliant.

Target (MT)	Fee (■)
Less than 50	2,500
50 to under 100	7,500
100 to under 1000	1,50,000
1000 to under 5000	10,00,000
More than 5000	15,00,000

3. Full Web App Code

data.forEach((c,i)=>{let t=c.annual*r,f=fee(t),good=c.actual>=t;if(good)ok++;out.innerHTML+=`<tr><td><b>${c.name}</b></td><td>${c.type}</td><td>${c.an
render();
</script></body></html>
```

4. Sample Data Used

Company	Type	Annual MT	Actual Recycled MT
Dixon Technologies	Manufacturer	120	90
Kaynes Technology	Producer	80	50
Foxconn India	Manufacturer	1500	1100
Tata Electronics	Producer	6000	4000
Centum	Recycler	60	42

For the default year 2026–27, the application applies the 70% target rate and automatically calculates the fee and compliance status for each company.

5. Conclusion

The requested web-app version of the mini-task has been completed. The source code is embedded in this PDF so the implementation can be submitted and reviewed as part of the project. The app works as a standalone HTML file and requires no external libraries or server.

Source basis: the supplied E-Waste Simple Task document, which identifies the CPCB FAQ on the E-Waste (Management) Rules, 2022 as its source.
