Maharashtra E-Waste Management Tracker Report (2025)

Executive Summary

This report presents an assessment of Maharashtra's e-waste management performance using the State E-Waste Management Tracker. The tracker evaluates seven major indicators: generation and inventory, collection performance, recycling infrastructure, regulatory compliance, informal sector integration, environmental and health safeguards, and awareness initiatives.

Overall Performance

Assessment Year: 2025
State: Maharashtra
Overall Score: 54.2/100 (Needs Improvement).

Generation & Inventory

The tracker covers 18 major districts including Mumbai City, Mumbai Suburban, Thane, Pune, Nagpur, Nashik, Palghar, Raigad, Chhatrapati Sambhajinagar, Solapur, Kolhapur, Sangli, Satara, Jalgaon, Amravati, Chandrapur, Nanded and Latur. Mumbai Metropolitan Region contributes the largest share of estimated e-waste generation.

Collection Performance

The tracker records generated e-waste, collected quantity, registered collection centres and collection performance. Collection efficiency remains an area requiring improvement despite the presence of authorized collection networks.

Recycling Infrastructure

The tracker includes Maharashtra-based recyclers such as Ecoreco, RecycleKaro, BKE Recycling, Nagraj E-Waste Recycling and Greentech Recyclers. These facilities provide significant formal recycling capacity.

Regulatory Compliance

Major electronics producers are monitored under Extended Producer Responsibility (EPR). Most entities are compliant with registration and reporting requirements, indicating relatively good regulatory implementation.

Informal Sector Integration

Major scrap clusters such as Dharavi, Kurla, Bhiwandi, Hadapsar, Pimpri-Chinchwad, Itwari, Satpur and Taloja are tracked. Many remain partially formalized, indicating opportunities for further integration.

Environmental & Health Monitoring

The tracker records soil, water and air monitoring activities together with worker health initiatives across identified e-waste hotspots.

Awareness & Outreach

Programs include World Environment Day drives, International E-Waste Day campaigns, college workshops, public collection drives, housing society campaigns, school awareness programmes and digital outreach.

Strengths

- Strong recycling ecosystem
- Good EPR compliance
- Active monitoring of major hotspots
- Statewide awareness initiatives

Recommendations

Increase collection efficiency, expand formal collection centres, integrate informal recyclers, strengthen district-level reporting, and continue awareness campaigns across urban and rural Maharashtra.
