Q.1 Compare E-waste data of India with 5 other countries

A. As per 2019

Country	E-waste Generated	Collection/Recycling
India	3.23 million tonnes	1.3% formally collected
China	10.13 million tonnes	16.1% formally collected
US	6.92 million tonnes	15.2% formally collected
Germany	1.61 million tonnes	51.9%
UK	1.60 million tonnes	56.6%
Japan	2.5 million tonnes	22.3%

Q.2 Give five methods that can be implemented in India to reduce e-waste

A.2 1. Strengthen collection and recycling systems by increasing authorized collection centres and recycling facilities

2. Implement Extended Producer Responsibility so manufacturers collect and recycle old electronic products.

3. Promote repair, reuse and refurbishment to extend the lifespan of electronic devices

4. Create public awareness about proper e-waste disposal instead of mixing it with household waste.

5. Enforce stricter e-waste regulations and integrate the informal recycling sector into the formal system with proper training and safety measures.
